HOW DO I START MY OWN ESTES ROCKET FLEET?
The best way to begin model rocketry is with an Estes flying model rocket launch set. Most of our launch sets are from the E2X® (Easy To Assemble) line. The rocket itself requires minor assembly. All launch sets come with an electrical launch controller, adjustable launch pad and instructions to get you out and flying in no time. You will need to purchase flight supplies (engines, recovery wadding, igniters and igniter plugs) and four new AA batteries (for the controller) – sold separately.

HOW EASY AND HOW MUCH TIME DOES IT TAKE TO BUILD MY ROCKETS?
Estes model rocket kits range from ready to fly in just minutes to those that provide many enjoyable hours of building fun. Estes kits are classified into seven categories.

READY TO FLY (RTF): No paint, glue or modeling skills required. Rocket comes assembled and is ready to launch in minutes.

E2X® (EASY TO ASSEMBLE): No paint or special tools needed. E2X® kits contain parts that are colored, easy to assemble, plastic fins or fin units and plastic nose cones. Glue the parts together as instructed, apply the self-stick decals and attach the recovery system.

Skill Level 1: Requires some painting, gluing and sanding. Features laser cut balsa fins, plastic or balsa nose cones, self- or Waterslide decals, unfinished body tubes and step-by-step instructions. Most kits are single stage rockets.

Skill Level 2: First tier of more advanced kits that require beginner skills in model rocket construction, finishing and painting. Features laser cut balsa fins, plastic or balsa nose cones, self- or Waterslide decals, unfinished body tubes and step-by-step instructions. These are unique designs that include multi-stages, payloads and scale models.

Skill Level 3: Second tier of more advanced kits that require moderate skills in model rocket construction, finishing and painting. Features multiple laser cut balsa fins and parts, unfinished body tubes, Waterslide decals, balsa or plastic nose cones, vacuum-formed plastic detailing and step-by step instructions. These complex designs include scale models, payloads and multi-stage rockets. These can use D and E engines.

Skill Level 4: Requires a high degree of construction and finishing skills. Features multiple laser cut balsa fins, vacuum-formed plastic detailing, unfinished body tubes and Waterslide decals. Assembly can take several days depending on the details required.

Skill Level 5: The most advanced and challenging kit level. These kits are designed for very experienced, master modelers. Construction is extremely complex using advanced wood, paper and plastic techniques. Finishing is detail-oriented that may involve elaborate paint schemes. Building and finishing these rockets can take up to a week or more.

WHAT IS AN ESTES MODEL ROCKET?
Estes model rockets are activity kits designed of lightweight materials such as paper tubing, balsa wood and plastic. Fins attached to the body tube help provide guidance and stability. An engine mount assembly holds the engine in place during rocket flight in most models.

HOW DOES IT WORK?
The Estes model rocket is propelled into the air by an electrically ignited model rocket engine. After its acceleration, the rocket continues upward emitting tracking smoke as it coasts. At the rocket’s peak altitude (also called apogee), a recovery device, such as a parachute or streamer, is deployed to return the rocket gently to earth. The rocket can then be prepared for another flight.

WHERE DO I FLY ESTES MODEL ROCKETS?
The chart on page 5 tells you what size field to use for each size engine. Each size is designated by a letter and is up to twice as powerful as the letter before it. See the engine section (pages 48-50) of this catalog for more information.
HOW DID IT ALL GET STARTED?
In the mid-1950s when the space age began, flying rockets became very popular. However, there were no propellants readily available to launch model rockets. In 1958 Vernon Estes developed the first, mass-produced model rocket engine. The Estes rocket engine was destined to make model rocketry one of the most popular outdoor activities enjoyed today. Estes products have changed with the times and you can see all of the exciting rockets in this catalog or on the web at www.estesrockets.com.

WHAT DO I NEED TO KNOW?
In this catalog, each description lists important INFORMATION:

- Specifications -- length, diameter and estimated weight.
- What engines we recommend.
- How high, on the largest engine recommended, the rocket flies (feet and meters).
- Projected altitudes are estimates only and your rocket's actual performance may vary.
- The type of recovery system that brings the rocket back -- parachute, streamer or other.

PARTS OF A MODEL ROCKET

MODEL ROCKETS ARE CONSTRUCTED OF LIGHTWEIGHT MATERIALS SUCH AS PAPER, Balsa and Plastic. THIS DIAGRAM SHOWS HOW PARTS FIT TOGETHER. NEARLY ALL ESTES PARTS THAT HAVE THE SAME SERIES DESCRIPTION NUMBER FIT PAPER, Balsa and Plastic.

1. Materials. I will use only lightweight, non-metal parts for the nose, body, and fins of my rocket.
2. Motors. I will use only certified, commercially-made model rocket motors, and will not tamper with these motors or use them for any purposes except those recommended by the manufacturer.
3. Ignition System. I will launch my rockets with an electrical launch system and electrical motor igniters. My launch system will have a safety interlock in series with the launch switch, and will use a launch switch that returns to the "off" position when released.
4. Misfires. If my rocket does not launch when I press the button of my electrical launch system, I will remove the launcher's safety interlock or disconnect its battery, and will wait 60 seconds after the last launch attempt before allowing anyone to approach the rocket.
5. Launch Safety. I will use a countdown before launch, and will ensure that everyone is paying attention and is a safe distance of at least 15 feet away when I launch rockets with D motors or smaller, and 30 feet when I launch larger rockets. If I am uncertain about the safety or stability of an untested rocket, I will check the stability before flight and will fly it only after warning spectators and clearing them away to a safe distance.
6. Launchers. I will launch my rocket from a launch rod, tower, or rail that is pointed to within 30 degrees of the vertical to ensure that the rocket flies nearly straight up, and I will use a blast deflector to prevent the motor's exhaust from hitting the ground. To prevent accidental eye injury, I will place launchers so that the end of the launch rod is above eye level or will cap the end of the rod when it is not in use.
7. Size. My model rocket will not weigh more than 1,500 grams (53 ounces) at liftoff and will not contain more than 125 grams (4.4 ounces) of propellant or 320 nitrogen pounds of total impulse.
8. Flight Safety. I will not launch my rocket at targets, into clouds, or near airplanes, and will not perform any flammable or explosive payload in my rocket.
9. Launch Site. I will launch my rocket outdoors, in an open area at least as large as shown in the accompanying table, and in safe weather conditions with wind speeds no greater than 20 miles per hour. I will ensure that there is no dry grass close to the launch pad, and that the launch site does not present risk of grass fires.

FULL ONE-YEAR WARRANTY

Your Estes product is warranted against defects in materials or workmanship for one year from the date of the original purchase. If this Estes product, because of a manufacturing mistake, malfunctions or proves to be defective within the one-year warranty period, it will be repaired or replaced, at Estes' option and at no charge to you, provided it is returned to Estes with proof of purchase.

This warranty does not cover incidental or consequential damage to persons or property caused by the use, abuse, misuse, failure to comply with operating instructions or improper storage of the warranted products. Some states do not allow the exclusion or limitation of incidental or consequential damages, so the above exclusion may not apply to you. This warranty gives you specific legal rights and you may also have other rights which vary from state to state.

For repair or replacement under this warranty, please contact us at www.estesrockets.com or by mail at Estes-Cox Corp., Customer Service Department, 1295 H Street, PO Box 227, Penrose, Colorado 81240-0227.

Fins: Plastic  
Recovery: 24 in. (61 cm) Parachute  
Projected Altitude: 700 ft (213 m)  
Recommended Engines: D12-3 (First Flight), E9-4*, E9-6*  
* Must be 18 to purchase E engines. E engines require an E Launch Controller and E Launch Pad.

Estes model rocketry is recommended for ages 10 years and up. Adult supervision is recommended for those under 12 years of age.
SKILL LEVEL 2 ROCKET KITS

2447 ASTRON ELLIPTIC II™ $11.99
Summer 2011
Length: 23.3 in. (59.2 cm)
Diameter: .74 in. (19 mm)
Estimated Weight: 1 oz (28.3 g)
Fins: Laser cut balsa
Recovery: Streamer and Tumble
Projected Altitude: 925 ft. (282 m)
Recommended Engines:
Upper Stage Only: 1/2A3-2T (First Flight), A3-4T, A10-3T
Two Stage: Booster – A10-0T
Upper – 1/2A3-4T, 1/4A3-3T, A3-4T, A10-3T

3217 VAGABOND™ $19.99
Summer 2011
Length: 35.25 in. (89.5 cm)
Diameter: 1.64 in. (42 mm)
Estimated Weight: 4.1 oz (116.2 g)
Fins: Laser cut balsa
Recovery: 18 in. (46 cm) Parachute
Projected Altitude: 1,275 ft. (389 m)
Recommended Engines: D12-5 (First Flight), D12-7, E9-6*, E9-8*
* Must be 18 to purchase E engines. E engines require an E Launch Controller and E Launch Pad.

3218 LASER LANCE™ $16.99
Summer 2011
Length: 20.25 in. (51.4 cm)
Diameter: 1.64 in. (42 mm)
Estimated Weight: 2.6 oz (75.4 g)
Fins: Laser cut balsa
Recovery: 12 in. (30.5 cm) Parachute
Projected Altitude: 282 ft. (86 m)
Recommended Engines: C11-3 (First Flight), C11-5, D12-5, D12-7

3219 AIR COMMANDER™ $24.99
Summer 2011
Length: 32.5 in. (82.5 cm)
Diameter: 1.33 in. (34 mm)
Estimated Weight: 3.8 oz (107.7 g)
Fins: Laser cut balsa
Recovery: 18 in. (46 cm) Parachute
Projected Altitude: 686 ft. (209 m)
Recommended Engines: Booster: C11-0 (First Flight), C11-5, D12-0, D12-5, D12-7

7216 EPM 010™ $19.99
Summer 2011
Length: 35.25 in. (89.5 cm)
Diameter: .98 in (25 mm)
Estimated Weight: 2.4 oz (68 g)
Fins: Laser cut balsa
Recovery: 12 in (30.5 cm) Parachute
Projected Altitude: 925 ft (282 m)
Recommended Engines: B4-4, B6-4 (First Flight), C6-3, C6-5

7217 HYPER BAT™ $14.99
Summer 2011
Length: 21.9 in (55.6 cm)
Diameter: .98 in (25 mm)
Estimated Weight: 1.8 oz (51 g)
Fins: Laser cut balsa
Recovery: 12 in (30.5 cm) Parachute and Tumble
Projected Altitude: 2,125 ft (648 m)
Recommended Engines:
Upper Stage Only: B6-4, (First Flight), B6-6, C6-5, C6-7
Two Stage: Booster – A8-0, B6-0 (First Flight), C6-0
Upper – A8-6 (First Flight), B6-6, C6-5, C6-7

Estes model rocketry is recommended for ages 10 years and up. Adult supervision is recommended for those under 12 years of age.
## SKILL LEVEL 3 - 5 ROCKET KITS

### 1335 MEGA MOSQUITO™
**Summer 2011**  
Skill Level: 3  
Length: 18.6 in. (47.2 cm)  
Diameter: 2.6 in. (66 mm)  
Estimated Weight: 5.2 oz (147.4 g)  
Fins: Laser cut balsa  
Recovery: 18 in. (46 cm) Parachute  
Projected Altitude: 750 ft. (229 m)  
Recommended Engines: D12-3 (First Flight), D12-5, E9-4*, E9-6*  
* Must be 18 to purchase E engines. E engines require an E Launch Controller and E Launch Pad.

### MEGA MOSQUITO™
**Skill Level: 1**  
Length: 3.8 in. (9.6 cm)  
Diameter: .54 in. (14 mm)  
Estimated Weight: .11 oz (3.1 g)  
Fins: Laser cut balsa  
Recovery: Tumble  
Projected Altitude: 800 ft. (244 m)  
Recommended Engines: 1/4A3-3T (First Flight), 1/2A3-2T, A3-4T, A10-3T

### 2134 MIRV™

Diameter: 1.64 in. (42 mm)  
Estimated Weight: 4.7 oz (134 g)  
Fins: Laser cut balsa  
Recovery: 18 in. (46 cm) Parachute  
Projected Altitude: 600 ft. (183 m)  
Recommended Engines: Booster Stage: B6-6, (First Flight) C6-0  
Second Stage: A10-3T Only

### 3221 QCC EXPLORER™
**SPECIAL PRICING $18.99**  
**Summer 2011**  
Skill Level: 4  
Length: 35 in. (88.9 cm)  
Diameter: 1.64 in. (42 mm)  
Estimated Weight: 5 oz (141.2 g)  
Fins: Laser cut balsa  
Recovery: 18 in. (46 cm) Parachute  
Projected Altitude: 1225 ft. (373 m)  
Recommended Engines: C11-3 (First Flight), D12-5, E9-4*, E9-6*  
* Must be 18 to purchase E engines. E engines require an E Launch Controller and E Launch Pad.

### 3223 XARCONIAN CRUISE™
**Summer 2011**  
Skill Level: 5  
Length: 22.7 in. (57.9 cm)  
Diameter: 1.33 in. (34 mm)  
Estimated Weight: 5.7 oz (165 g)  
Wing Span: 8.4 in. (21.3 cm)  
Fins: Laser cut balsa  
Recovery: 18 in. (46 cm) Parachute  
Projected Altitude: 525 ft. (160 m)  
Recommended Engines: B6-2, C6-3 (First Flight)

Estes model rocketry is recommended for ages 10 years and up. Adult supervision is recommended for those under 12 years of age.

## ENGINE CHART

- Delays have a tolerance of plus or minus 10% or 1 second, whichever is greater.
- All Estes engines come complete with igniters and patented igniter plugs (Pat. No. 5,410,966 and 5,509,354).
- The Estes Igniter Plug makes engine ignition extremely reliable.
- Do not fly a rocket/engine combination whose liftoff weight exceeds the recommended maximum liftoff weight.

### WHAT SIZES ARE AVAILABLE?

GET YOUNG PEOPLE EXCITED ABOUT LEARNING!

Inspiring students and young people – that’s what Estes Educator is here to do! Just log onto EstesEducator.com to find everything you need for your classroom or youth organization. We’ve made it easy to bring the fun of model rockets to your students.

- Free lesson plans
- Automated list of items needed
- Links to funding and grants
- Extensive resource materials
- Special Discount Bulk Packs

Estes Makes it EASY!

“Estes model rockets are the best hands-on activity I have ever done with my students!”

FREE LESSON PLANS ONLINE

Use the handy pull-down menus to:
- Choose a grade level
- Choose a subject
- Choose the number of classroom sessions

The perfectly matched lesson plan will be displayed!

AUTOMATED LIST OF ITEMS NEEDED

After choosing a lesson plan, just enter the number of students and our website will automatically display a list of recommended rockets and accessories. We’ve removed the guesswork and determined the best, most budget-friendly choices for you.

LINKS TO FUNDING

We’ve located a number of organizations that support teaching with model rockets. From EstesEducator.com, you can link directly to funding opportunities to get the application process started. Many are easy to request and you can expect a response quickly.

EXTENSIVE RESOURCES ONLINE

In addition to free lesson plans, we have many resources available and easily accessed. At EstesEducator.com you can find useful information about:

- How to Choose a Launch Site
- The Basics of Model Rocketry
- Reference Guide for Teachers and Youth Group Leaders
- Worksheets for the Classroom
- Videos, Curricula and much more
SPECIAL BULK PACKS FOR EDUCATORS

Estes offers 12- and 24-piece discount Bulk Packs especially for educators and youth group leaders. Bulk Packs are available for a variety of rockets, including E2X® Easy To Assemble Rockets and Skill Level 1 Rocket Kits. (Rocket Engines, Recovery Wadding, Igniters and Igniter Plugs are sold separately.)

E2X® EASY TO ASSEMBLE BULK PACK ROCKETS

E2X® Kits can be assembled in about one hour. Simply glue the parts together according to the instructions, apply decals and attach the parachute. They require no special tools or painting.

ROCKET ENGINE BULK PACKS

Every launch requires Engines, Recovery Wadding, Igniters and Igniter Plugs. These convenient Engine Bulk Packs include enough of each for 24 launches. Choose from a variety of engine sizes. We advise using the smallest recommended engine for first flights.

SKILL LEVEL 1 BULK PACK ROCKET KITS

Skill Level 1 Rocket Kits require more model building and decorating. Most can be built in less than two hours and require fins to be assembled and some painting.

LAUNCH EQUIPMENT

For first time flights you’ll need launch equipment, which can be reused launch after launch. We recommend choosing a Launch Set, as shown on pages 12 to 15 of this catalog. With each Launch Set you get the Launch Controller, Launch Pad, plus a rocket for the teacher.
