ROCKET KITS
Building is a blast!
Boosts confidence and science skills.

Why kits rule:
- You can create custom designs, for totally unique looks.
- Experience grows with each rocket you build.
- It’s a cool way to learn about science.

Baby Bertha™
The Baby Bertha assembles and finishes in a few hours. Paint it to match the package, or create your own crazy design! Includes laser-cut balsa fins, a 12” (305 mm) recovery parachute, a one-piece plastic nose cone and waterslide decals.
- Max. Altitude: 575 feet (175 m)
- Height: 12.8 in (32.5 cm)
- Skill level 1
ESTT1261

Hi-Flier®
The trim Hi-Flier builds in an afternoon, and launches in an instant! Features die-cut balsa fins, a recovery streamer, a one-piece plastic nose cone and self-adhesive decals.
- Max. Altitude: 1675 feet (510 m)
- Height: 12 in (30.5 cm)
- Skill level 1
ESTT2178

Big Daddy™
Highly streamlined, to reach astonishing heights! Features laser-cut wood fins, a 24” (61 cm) recovery parachute and waterslide decals.
- Max. Altitude: 900 feet (274 m)
- Height: 19 in (48.3 cm)
- Skill level 2
ESTT2162

Comanche-3™
The classic Estes multi-stage rocket kit! Features laser-cut wood fins, two recovery streamers and waterslide decals.
- Max. Altitude: 2660 feet (811 mm)
- Height: 41 in (104.1 cm)
- Skill level 3
ESTT1382

Note: All kits require engines, a launch system, igniters, recovery wadding, tools and finishing supplies. The Big Daddy and the Comanche-3 also require an Estes Maxi™ Launch Rod - ESTT2244 (sold separately).
