**ENGINE MOUNT FIN ATTACHMENT**

1. Apply glue to root edge of E. Allow to dry 1 minute. Apply 2nd layer of glue.
2. Position E centered over fin line. Check alignment using guide. Let dry. **DO NOT APPLY GLUE TO GREEN ADAPTER RING!**
3. Repeat for other E.

**UPPER BODY FIN ATTACHMENT**

1. Apply glue to root edge of F. Let dry 1 minute. Apply 2nd layer of glue.
2. Position F centered over FL. Let dry.
3. Repeat for other F.

**NOSE CONE ASSEMBLY**

1. Cut the H into 3 equal pieces.
2. On a flat surface roll each piece into a thin round section.
3. Insert each section into H and press into the tip of E with a pencil or launch rod.
5. Apply ring of cement inside I. Insert I in H.

**LAUNCH LUG ATTACHMENT**

1. Sand E with fine sandpaper.
2. Apply glue along fin joint. Position E even with rear of E. Let dry.

**ROCKET FINISHING**

NOTE: We have found Testors One Coat Lacquer, Testors Model Master spray paints and Testors Gloss Lacquer ($1.96) to be excellent for providing a long lasting and durable finish on your rocket. Always be sure to spray your models outside or in a well ventilated area.

**STEPS TO A QUALITY FINISH**

1. Lightly sand entire rocket smooth with fine sandpaper (#320 or #400 grit).
2. Apply glue to fins and launch lug joints. Allow glue to dry overnight.
3. Use a stick inserted into the engine tube end of the booster and upper stage for painting.
4. Apply 1-2 light coats of white primer to booster and upper stage.
5. Lightly sand between coats with fine sandpaper (#320 or #400 grit).
7. Spray upper section bright silver.
8. Apply water slide decals.
9. Apply waterslide decals.
   a. Cut the decal to be applied from the decal sheet, trimming close to the decal edge.
   b. Place decal in bowl of warm water until decal begins to curl.
   c. Remove decal, position in place and slide the decal backing material from under the decal and onto the model as close to that position as possible.
   d. Gently blot out excess water with a clean paper towel.
   e. Allow decals to set overnight before applying protective clear coat.
9. When decals are dry, spray entire rocket (each piece separately) with a light coat of Testors Gloss Lacquer ($1.96). This will provide added protection and shine to your Muller-By rocket!
