ASSEMBLE MOTOR MOUNT / ENSEMBLE DEL SOPORTE DEL MOTOR / ASSEMBLER LE BÂTIMENT MOTEUR

1. Attach the rear motor mount bracket to the fuselage using the provided screws.
2. Secure the motor mount to the fuselage with the included nuts and washers.
3. Install the motor onto the mount, ensuring a tight fit.
4. Connect the motor leads to the receiver and ESC as instructed in the manual.

ASSEMBLE BODY / ENSEMBLE DEL CUERPO / ASSEMBLER LE CORPS

1. Begin by attaching the body shell to the fuselage using the provided screws.
2. Install the canopy onto the body shell, aligning the marks for a secure fit.
3. Connect the canopy light to the receiver,
4. Ensure the canopy is securely fastened with straps or ties.

ASSEMBLE NOSE CONE / ENSEMBLE DEL CONO DE LA NARIZ / ASSEMBLER LE NEZ CONIQUE

1. Slide the nose cone onto the nose section, aligning the marks for proper alignment.
2. Secure the nose cone with the included screws.
3. Check the orientation of the nose cone before installation.
4. Fasten the nose cone securely to the fuselage using the provided hardware.

ATTACH SHOCK CORD / FERIR LA CUERDA DE TENSION / ATTACHER LE SANGUIN

1. Place the shock cord over the canopy light, ensuring it is centered.
2. Attach the shock cord to the canopy using a plastic fastener.
3. Adjust the length of the shock cord to provide the desired tension.
4. Repeat for the opposite side of the aircraft.

ROCKET FINISHING / TERMINADO DEL COHETE / FINITION DE LA Fuse

Spray the missile body white. It may be a good idea to secure a plastic cover over the body to protect it from dust.

PREPARE RECOVERY SYSTEM / PREPARAR EL SISTEMA DE RECUPERACIÓN / PRÉPARER LE SYSTÈME DE RÉCUPÉRATION

1. Attach the recovery system to the fuselage using the provided bolts and washers.
2. Ensure the recovery system is properly aligned with the body.
3. Connect the recovery lines to the receiver as instructed in the manual.
4. Adjust the recovery system to accommodate the desired recovery depth.
